

Chemtrails - Poison from the sky!

- For the past 3 weeks I have been receiving first hand reports of U.S.
- Military jets spraying toxic substances over populated urban areas
- testing the effectiveness of their biological and chemical warfare
- protective suits and monitoring equipment. The substances are
- SUPPOSEDLY "harmless" simulants which have extremely toxic
- > effects of their own. To date, literally thousands of civilians have
- > been made very sick mostly with respiratory illnesses and distress
- > and even scores of deaths.
- > Citizens, Patriots, and Veterans, no need to wait for these
- > Nuclear, Biological, and Chemical warfare attacks against us because
- > they have been going on for quite some time now. Why? Because the
- > New World Order's Elites' plan is to reduce the population of the world
- > by 25% by the year 2000 (Y2K is truly an appropriate crisis), 50% by
- > 2025, 75% shortly after that, and by 85% to 95% as a final goal to
- > leave only 200 million people alive world wide. Of course these
- > surviving people will only be comprised of the Elites and their prison
- > labor slaves incarcerated in Clinton's Civilian Concentration Camps
- > here in the U.S. and in other concentration camps around the world.
- > Why? Because the Elites want to "save" the world's natural resources
- > for themselves. They don't want other people using them as they
- > think our resources are running out when in actuality all we have to
- > do is use our technology to use them more efficiently and produce
- > replaceable natural resources. Like why use up our finite petroleum
- > resources when we can use bacteria and yeasts to grow on discarded
- > organic matter to produce alcohol for fuels?
- > England has had 6,000 deaths in the past two weeks from respiratory
- > failure caused by this Military spraying currently.

PEOPLE OF THE WORLD come together, we can't
let a handful of control freaks poison us + sit
back + do nothing. Put up a united front!

Rally on the web! Rally on the web!

subjects” - the current chemtrail program is far too pervasive and persistent to coincide with previous biowarfare tests conducted at specific locations over a few days.

Nor are supposedly harmless biowar “simulants” being used today. “Bio-hazard” materials found in low-level gel and red powder drops by startled laboratory technicians include corroborative “cocktails” of disease-causing bacteria, molds and fungi. (The televised 1994 gel drops over Oakville, Washington were also found by the state health department to contain human blood cells.)

8. Cobweb-type material has also fallen across the United States, Canada, the Caribbean, Australia and South Africa. Eye-witnesses report fine filaments - sometimes referred to as “angel hair” - being dropped over Salisaw, Oklahoma and Karoo, South Africa from high-flying jet aircraft. *So far, microscopic examinations revealing the possible presence of inert blood cells have not been corroborated by actual lab tests.*

9. A call by Edward Teller for an aerial “sunscreen” to be sprayed above the Earth, *a practical patent for the reduction of greenhouse warming by spraying reflective aluminum particles from jets*, and a study by the Lawrence Livermore National Laboratory confirming that this billion-dollar-a-year aerial spray program would prevent further warming despite a projected doubling in CO₂ emissions came in 1998 as the world’s insurers pressed governments to turn down the heat on rapidly rising temperatures. Reeling from catastrophic storm losses up 1,500% over the past decade, the insurance lobby is a voice - and money market investor - bigger than Big Oil and the international trade in arms.

10. *The only actual laboratory test carried out on rainwater falling through heavy chemtrails over Espanola, Ontario found aluminum particles at seven-times maximum permissible “safe” levels.*

11. *Aluminum is a potent neurotoxin capable of producing all symptoms of Chemtrail-Related Illness (CRI).* Unlike viral-derived illness, the absence of contagion between exposed and non-exposed family members - along with asthma attacks and other severe allergic reactions - points to a non-viral cause of chemtrail sickness.

12. Jet fuel ingredients found to cause severe allergic reactions include benzene byproducts and Ethylene Dibromide (EDB). Tests on commercial jet fuel (not chemtrails) carried out by Aqua-Tech labs in 1997 found in lab sample #MEL 97-1140, 51 toxic substances - including benzenes, various methanes, carbon tetrachloride, styrene, toluene, and 1,2 dibromethane (EDB).

The EDB measured by Aqua Tech was found at such minute levels as to be almost undetectable. But the Registered Microbiologist who submitted this California JP-8 jet fuel sample disputes the official lab report, insisting that the actual levels of this potent carcinogen (banned by emergency EPA order in 1984) were much higher. Recently reported NASA lab tests of JP-8 do not substantiate his claim.

13. Despite laboratory evidence of potent chemtrail allergens, the weeks-long dry hacking cough and other extreme and persistent symptoms often experienced in the wake of chemtrail spraying - coupled with reoccurring illness in the absence of re-exposure - argue strongly for a pathogenic component. With the CDC now reporting that an unknown disease-causing parasite is responsible for epidemics that most often test negative for influenza, *this reporter believes that parasitic fungal infection is the primary agent of systemic sickness in the North American population today.*

Since no actual chemtrail plumes have been tested, it is not yet possible to say whether fungal spores growing inside jet fuel tanks or deliberately introduced into the spray “mix” are part of the chemtrail

program. But immune-weakening reactions to aluminum dust fine as talcum powder could leave susceptible persons vulnerable to extremely toxic fungal mycotoxins already proliferating in the environment.

The escape of germ warfare-modified mycoplasma fungi into the general population following the Gulf War, and the sudden appearance of other "stealth" pathogens such as viral-bacterial-fungal hybrids called viteria are further cause to suspect inadvertent and intentional releases of experimental bio-agent: from secretive biowarfare labs. Adding chemtrail contamination to this unholy brew is extremely hazardous.

14. Though aluminum carries a relatively low electrical conductivity, the possible presence of other chemicals and/or metals in chemtrail sprays could interact unpredictably with electromagnetic energy already saturating urban environments. The possibility of deliberately introduced pulsed microwaves or low frequency waves to cause confusion and illness cannot be ruled out. On several occasions, aircraft displaying unusual antenna have been sighted during chemtrail activity and simultaneous television interference on the ground. At least two observers report electromagnetic alarms sounding during chemtrail flyovers.

15. So far, those persons with strong immune systems appear to be either unaffected by chemtrails, or recover relatively quickly from heavy exposure. Reported effective treatments and preventative "cellular shielding" include homemade colloidal silver, liquid oxygen supplementation, and high-quality vitamin and herbal supplements. Laboratory-confirmed mycoplasma infection can almost always be cured by repeated courses of specific antibiotics such as doxycycline *administered under a physician's direct supervision*.

16. While the best available print and photographic documentation confirms what USAF "Weather Force Specialists" refer to as chemical spraying for the purposes of "aerial obscuration" - the bottom line of the chemtrails conundrum remains: *We still cannot say for certain what is being sprayed on us, and why.*

17. Any government that continues to spray toxic substances on its own people for any reason - knowing that an epidemic of fatalities is taking place at the same time - *is committing murder.*

18. Under the Uniform Code of Military Justice, it is illegal to carry out an illegal order. Even if undertaken as an "operational necessity" for reasons of unannounced and unsubstantiated national security, any member of the military who deliberately sickens and kills her or his own people *is committing treason* against the populace they are pledged to protect.

Our investigation continues.

ALUMINUM TOXICITY

While denying any involvement in spraying anything from KC-135 and C-130 aircraft witnessed by many Espanola residents (including a former Ontario Provincial Police officer), the U.S. Air Force has published a study describing their attempts to "Own
